

At GeoTility, we have dedicated ourselves to being an industry leader by providing the highest quality products, technical knowledge, and service to our clients. With the help of our dedicated team, we have successfully completed hundreds of geothermal installations ranging from single family residential homes to the most ambitious commercial/institutional projects.

We are looking for motivated, positive individuals, who bring a passion for excellence and a commitment to teamwork. The challenge and responsibility presented in undertaking the work will allow the individual to develop a robust skill set, while making a lasting contribution to the advancement of a growing industry that strives to enhance environmental sustainability.

The successful candidate is needed immediately to fill a full-time position with our geothermal and hydronics team. Primary activities will include pipe installation (interior and exterior), wiring and controls, and service work.

The following are some of the typical duties/responsibilities expected for this position:

- Maintaining a clean and organized job site
- Preparing work plans and bill of materials
- Maintaining as-built and testing records
- Presenting solutions to problems
- Contributing to improvement of procedures and processes
- Developing trade knowledge and advancing towards Journeyman designation
- Actively participating in job site safety programs
- Servicing equipment and tools
- Reading and following blueprints
- Commissioning and troubleshooting systems
- Handling of tools and materials - heavy lifting (100 pounds +)

Requirements:

- Class 5 license with clean driving record
- Plumbing/electrical/controls experience is an asset
- Leadership experience is an asset
- Construction experience is an asset
