

## **Mechanical Estimator – Port Coquitlam**

Hays Mechanical construction team in Vancouver, are recruiting for an Estimator in Port Coquitlam.

### **Your new company**

The company has been in operation for over 50 years, specializing in ICI projects across the lower main land. Their projects are large in size and scope, ranging from 5- 14 million. They are originally a family run business, and have many people who have developed over the years with the company, so they truly invest in their people, and care about career development long term. Due to progression planning and growth, they are seeking an Estimator to join their office team.

### **Your new role**

As the Estimator, you will be responsible to complete all budgeting, negotiating, organizing and presenting bids. Your position will be to analyze all projects before kickoff, estimating all relevant costs relating to labour, materials and equipment. You will support the company's growth, putting together estimates for all projects. You will review and comprehend technical and administrative documents. Determine a list of material takeoffs to define quantities of work materials, determine work crews and production rates and break down scope of work to definable tasks. This role would be well suited for someone with a Mechanical Engineering degree, or experience in the field, who is looking to learn in an office environment and develop long term.

### **What you'll need to succeed**

To succeed as the Estimator, you will bring 5+ years' experience within Mechanical contracting, you must have supporting designation/ education or a Red Seal ticket, and a desire to learn. You will be very well organized, adaptable and function well in a fast paced environment You will be a forward, strategic thinker, and have strong negotiation and communication skills. You will work well in a team oriented environment, and be seeking long term career growth.

### **What you'll get in return**

As the Estimator, you will be entitled to earn a competitive package, comprised of base salary, benefits and vacation. Further, you will be joining a reputable business, with over 50 years of continued success, who will give you exposure to exciting and challenging projects.

### **What you need to do now**

If the Estimator opportunity sounds like it could be suited for the next step within your career, apply now. Taylor Housdon, your Mechanical construction Consultant will be in touch with those qualified to discuss next steps.
